TUNE YOUR GUITAR FAST AND PRECISELY!

Listen article.

Do you have trouble tuning your guitar? Don't fret, Easy Guitar Tuner will help you check the tuning of your guitar and fine-tune individual strings using its precise chromatic tuner!

The chromatic tuner in this app comes with audio input and microphone support, so make sure your microphone is on and turn up the volume.

Select the pitch mode you prefer (Easy Guitar Tuner has 11 to choose from). The buttons on the bottom of the app window will show you what each of the six strings is supposed to sound like when perfectly tuned.

Another feature of this app is the Repeat Mode. It repeats the sound of your selected string, allowing you to do most of the tuning without taking your hands off your guitar.

To check the tuning of the string you are working on and to fine-tune it, use the chromatic tuner in the middle of the app window. If your string is perfectly tuned, it will flash green. If it needs additional tuning, the tuner will flash red. It will even tell you, whether your string needs to be tuned up or down: if the arrow on the left side flashes red, it means that your string sounds too low and needs to be adjusted up. If the arrow on the right side flashes red, it means that your string sounds too high and needs to be adjusted down. Just keep adjusting the string until the tuner flashes green. Then, proceed to the next string. Tune them all with Easy Guitar Tuner and enjoy playing your perfectly tuned guitar!
