IMPROVE THE SIGHT READING OF THE GUITAR NOTES!

Guitar Notes Finder offers you one of the easiest ways to learn to play guitar. In just a few minutes a day, you can learn to read sheet music for guitar with its Note Explorer mode. For more advanced guitar training, try the NoteTrainer mode. This guitar app has a full guitar note range with authentic acoustic guitar sounds for every note you play (and you can even tune your guitar using these sounds!), treble and bass clef modes that include flats and sharps, standard (A,B,C) and solfeggio (do, re, mi) notation types and adjustable volume. Its user-friendly interface is retina display-supported.

The "Note Explorer" mode shows you guitar notes for beginners or advanced players. Click on „Find Note“ and explore notes on a virtual music sheet by moving your cursor up or down. At the same time, the blue dots on a virtual guitar fretboard will show you where you can find these notes on a guitar. Or, you can do it the other way around and click on different positions on the fretboard, until you find the note you need. It will also show up on the music sheet. Listen to the notes, play around with them and try to remember their positions on the guitar fretboard.

If you already know a few notes, try the "Note Trainer" mode. Click on Training, then Start and look at the guitar fretboard. The blue dot on the fretboard is the note you are supposed to guess. This activity is timed and pretty fast-paced, but the more you play, the better you get! The Guitar Notes Trainer evaluates your results after every guitar training session and shows you your successes and challenges. You can compare your current scores with previous ones and measure your progress in reading and recognizing guitar notes, and challenge yourself to beat your latest personal best!

Download Guitar Notes Finder now!
