[Listen article.](#)

If you are looking for the perfect chords for your bass guitar, let BassChordsCompass Lite help you with that! This free bass guitar learning software has chords for all the common bass guitar tunings and supports both right-handed and left-handed players. If you are a fan of GarageBand, you will be happy to find out that this app is compatible with the Smart instruments. BassChordsCompass Lite also has retina graphics and adjustable volume.

BassChordsCompass Lite lets you explore all the possible chords for 4 of the keys (C, C#, D, D#) on the virtual bass guitar fretboard and as bass guitar music notes. You can play all of those chords with authentic bass guitar sound and learn them as you go, or save them as virtual bass guitar sheet music for your bass guitar music pieces or your future practice sessions. Want more chords? Upgrade to BassChordsCompass (<http://neonway.org/basschordscompass/>), the full version of this app.

This is how you select a chord: choose a key on the left, the chord type in the middle, and, if needed, a chord type addition on the right. Next, you click on the virtual bass guitar fretboard and select the position for this chord. BassChordsCompass Lite will show you all the possible chords in this position. You can listen to them with authentic bass guitar sound, learn them at your own pace, or save them in an editing program as virtual sheet music by using Drag&Drop.
