TUNE YOUR MANDOLIN FAST AND PRECISELY!

Listen article.

Need some help tuning your mandolin? Try Mandolin Tuner! Our app will help you with the tuning process, and it will also help you fine-tune each of the strings using a chromatic tuner with audio input and microphone support. Turn up the volume on your device, make sure your microphone is on and let's start tuning your mandolin!

Mandolin Tuner has 11 pitch modes for you to choose from. Select the one you like.

On the bottom of the app window, the buttons play the sound for each string of a perfectly tuned mandolin. You can use those buttons alone or with the Repeat Mode, which repeats the sound of the string you selected. You can accomplish most of the tuning without taking your hands off your mandolin!

The chromatic tuner in the middle of the app window is used for precise tuning of individual strings. Play a string, and if it is perfectly tuned, the tuner will flash green. If the tuner flashes red, the string will need additional tuning. The chromatic tuner will show you whether your string needs to be adjusted up or down. If the arrow on the left side flashes red, your string sounds too low and needs to be tuned up. If the arrow on the right side flashes red, your string sounds too high and needs to be tuned down. Keep tuning the string until the chromatic tuner flashes green. Continue with the next string. Keep going until all of the strings are perfectly tuned and enjoy playing your mandolin!

Download Mandolin Tuner now!
