TUNE YOUR CELLO FAST AND PRECISELY!

Listen article.

Tune your cello quickly and accurately! Simple and powerful tuner will help you with it! You can not only listen to a realistic sound of each adjusted contrabass string, but also check correctness of tuning and "grind" it with help of the chromatic tuner which is located in the middle of an application window!

To start tuning a cello choose the most suitable timbre from list of 11 available. Four buttons in the bottom of an application window match four strings of a cello. Each will reproduce a sound of ideally tuned tool string. If you want to simplify tuning process use the Repeat Mode. It will allow you to tune a cello without taking your hands off from it. The chromatic tuner in the middle of an application window will automatically check how the string on which you work is tuned. Also you can use it for fine tuning of strings of a cello. If the string is tuned ideally, the chromatic tuner will blink green. If it blinks red you need to continue tuning. The app even tells You what to do with the string: if you see a red arrow pointing to the right, the string is not tight. If the red arrow points to the left the string is over tightened. Continue tuning the string until the tuner will not flash green, then go to the next string, and so on until your cello is perfectly tuned.

App-functions:

Chromatic tuner with audio input and microphone support;

The tone generator with the original sound of the cello;

Automatic repeat of played sounds

11 timbres:

+ Baroque

+ Scientific,

+ France 1859,

+ New Philharmonic,

+ Concert,

+ Boston Symphony,

+ New Berlin,

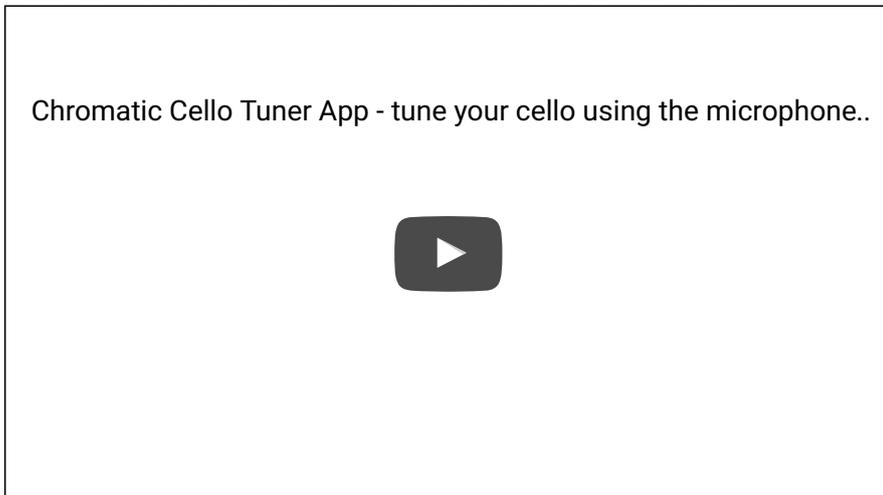

+ Moscow theater,

+ Old Berliner Philharmoniker,

+ Old Philharmonic,

+ Renaissance.
