

APP UKULELE NOTES FINDER

Home (https://neonway.org/) / Blog (https://neonway.org/category/blog/) / APP Ukulele Notes Finder

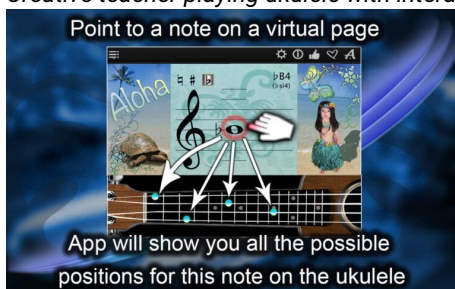

A CONVENIENT AND ENTERTAINING APP WILL GIVE YOU THE OPPORTUNITY TO LEARN THE POSITIONS OF A VARIETY OF NOTES ON THE UKULELE

Ukulele is often associated with exotic songs and Hawaii, although in fact it resembles a Portuguese instrument – a machete. Learning to play the ukulele is both interesting and useful, because this tool is very widely used.

UkuleleNotesFinder is a fairly useful software that gives you the ability to interactively study the positions of different notes in the sheet of music and chords on the ukulele.

Creative teacher playing ukulele with interactive interface

The app can help you learn about the location of notes in the table and chords on the ukulele. When hovering the pointer on the sheet of music, you can instantly check the name of the note and its placement relative to the ukulele chords.

You can do the opposite: point the mouse at the vulture, and you will see the corresponding note in the sheet of music.

A useful tool for testing musical knowledge

UkuleleNotesFinder provides you with a convenient way to test your knowledge of musical notes that you have tried to learn. You need to choose the correct name of the note depicted on the ukulele. Your answers will be recorded and after testing you will be able to see detailed statistics of your results. This will help you find out what musical notes you still need to teach. You can find out more about the program [HERE](https://neonway.org/ukulelenotesfinder/) (https://neonway.org/ukulelenotesfinder/).

In addition, the program plays the corresponding sound of a musical note whenever it is pressed, so realistic, as if it is played by a real ukulele.

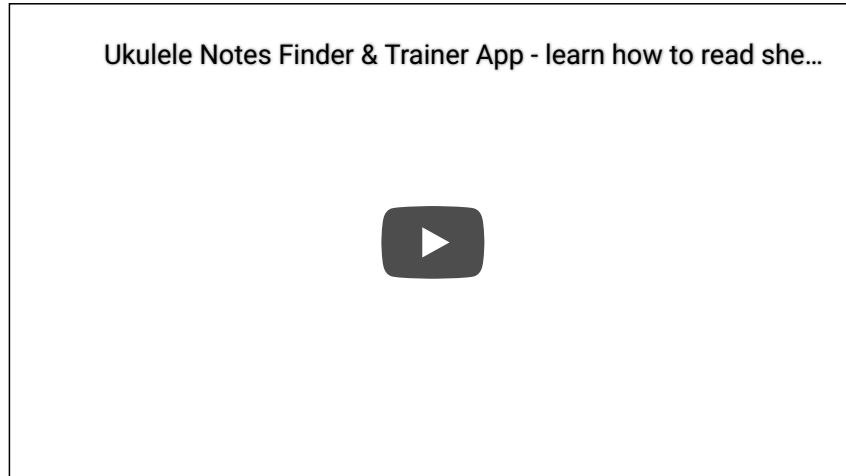

Hilarious and comfortable virtual music teacher

In general, UkuleleNotesFinder is the perfect kickstarter for those who want to learn how to play the ukulele. This app is designed for the most part for mobile phones with touch screens. You can use a variety of add-ons to work with it to make it more convenient to use on your computer and add some features. For example, the function of displaying keys for each note or recording and saving the sounds being played.

On YouTube you can watch a video of how the program works.
